

```
1 package main
2
3 import (
4     "fmt"
5     "log"
6     "net/http"
7 )
8
9 func hello(w http.ResponseWriter, req *http.Request) {
10     fmt.Fprintf(w, "Hello, World!")
11 }
12
13 func main() {
14     http.HandleFunc("/", hello)
15
16     err := http.ListenAndServe("localhost:9999", nil)
17
18     if err != nil {
19         log.Fatal(err)
20     }
21 }
22
```
